Final Vaccination date: _____

I, the undersigned, am a legally qualified medical practitioner, licensed to practice in the Province of Ontario. This report confirms my evaluation and medical opinion of the applicant.

Signature of Physician: _____

Date: _____

APPENDIX 'A'

FIREFIGHTER POSITION PROFILE

(To be completed by Family Physician with Medical Examination Report)

TASKS INCLUDE: carrying heavy equipment such as ladders, chain saws, fire hose, hydraulic extrication tools, etc., lifting, pulling, chopping, climbing stairs/ladders, crawling, wearing self-contained breathing apparatus and other heavy personal protective equipment, driving and operating emergency vehicles, performing cardio-pulmonary resuscitation.

ENVIRONMENTAL FACTORS INCLUDE: possible exposure to toxic gases and particulates, chemicals, wet/damp conditions, exposure to extreme temperature variations for lengthy periods of time, required to perform tasks in confined working spaces.

STRESSORS: firefighting requires an individual to go from minimal physical activity to peak physical activity within a noticeably short time frame. Physical stress is amplified by the need to wear heavy personal protective equipment while carrying, pulling, pushing, lifting a variety of materials. In addition to physical stress, firefighters are exposed to emotional stress while performing rescue activities involving patients that are severely injured or deceased and while administering first aid/CPR involving profuse bleeding and vital signs absent. Often, the patients are known to the firefighters in smaller communities, adding to the stress load.

I have reviewed the contents of the Firefighter Position Profile prior to determining if the applicant is medically fit to perform the duties of a firefighter.
